Jonathan's Own Version of Emacs

Jove is a "hot keypad" editor. Whatever you type gets inserted into the file at the current 'point'. You use ctrl-characters to move around and give commands. Here is a quick summary of some useful jove commands:

Introductory Notations

CTRL-	A control character. Ctrl-f means "control-f".
ESC-	A two-character command sequence where the first character is the ESC key (Altmode). Esc-f means ESC, then "f".
Esc-x string	A command designated "by hand". Esc-x revert file means: type ESC, "x", "revert file", then <cr>.
Point	Point is the current position of THE LEFT SIDE OF THE CURSOR.
Rubout	Delete key on newer keyboards.

Exiting Jove

Ctrl-X Ctrl-R	Read file. Prompts for file name.
Ctrl-X Ctrl-	Save file.
Ctrl-X Ctrl-W	Write file. Prompts for file name.
Ctrl-X Ctrl-C	Exit Jove. Use C-X C-\ to save changes before leaving.
Esc S	Pause Jove. Temporary exit to shell. Return using fg. csh(1)

Buffer Operations

Ctrl-x Ctrl -f	Get a file into a buffer for editing (prompts for filename)
Ctrl-x b	Select a different buffer (prompts; default is last one)
Ctrl-x Ctrl-b	Display the list of available buffers
Ctrl-x k	Kill buffer (prompts; default is current one)
Esc-<	Move to the top of the current buffer
Esc->	Move to the end of the current buffer
Esc-g n	Move to line n
Esc-x number	Number the lines in the buffer, or get rid of the numbers if they are already there.

Character Operations

Ctrl-A	Move to the beginning of the line.
Ctrl-E	Move to the end of the line.
Ctrl-F	Move forward over one character.
Ctrl-B	Move backward over one character.
Ctrl-N	Move down one line.
Ctrl-P	Move up one line.
Ctrl-V	Move down one page/screen.
Ctrl-Z	Move up one page/screen.
Esc ,	Move to the beginning of the visible window.
Esc .	Move to the end of the visible window.

Word Operations

Esc-b	Move left (Back)
Esc-f	Move right (Forward)
Esc-RUBOUT	Kill left (Ctrl-y yanks it back at point)
